

UNDERGRADUATE MINOR IN EDUCATION

Graduate School of Education UC Berkeley Course List SPRING 2022

Updated 9/29/21

CORE COURSE (either version)

EDUC 190AC Critical Studies in Education (4)

Hull/Leibovitz

This course examines how learning environments can empower and disempower individuals and explores the role of education in the social construction of hierarchy, inequality, difference, identity, and power. It embodies a democratic philosophy and practice, creating a learning community that encourages students to take responsibility for their own education and learn through theory, experience, and dialogue. *Satisfies the American Cultures requirement. As part of the course requirements, students engage in a community project that is equivalent to 1 unit of fieldwork for the Education Minor. Some spaces reserved for Ed Minor declared upper division students - contact Ed Minor advisor.*

EDUC W190A Berkeley Changemaker: Critical Studies in Education (4)

Hull

This web-based version of the Ed Minor core course examines how learning environments can empower and disempower individuals and explores the role of education in the social construction of hierarchy, inequality, difference, identity, and power. It embodies a democratic philosophy and practice, creating a learning community that encourages students to take responsibility for their own education and learn through theory, experience, and dialogue. *Satisfies the American Cultures requirement. As part of the course requirements, students engage in a community project that is equivalent to 1 unit of fieldwork for the Education Minor. Some spaces reserved for Ed Minor declared upper division students - contact Ed Minor advisor.*

FIELD STUDY COURSES – School of Education

EDUC 197 Education Field Studies (1-3 units)

Staff

45 hours of fieldwork per semester = 1 unit; variable units available. Students take part in organized and supervised field programs involving experiences in tutoring/mentoring in schools and school-related programs on or off campus. *Section descriptions and contact information can be found on the Ed Minor website's requirements page. Enrollment codes are received from site coordinators for each section. Can be repeated for credit. P/NP grading. Ed Minor students may enroll in this course for some or all of the field units for the Minor.*

EDUC W144 Practicum in Education (1-3 units)

Murphy-Graham

This course serves the Ed Minor mission of developing students' critical habits of mind and reflection in educational research and practice. The course develops student awareness of their role as participant/observer, increases their understanding of ethical issues, and their ability to articulate these issues. Topics shape a productive field experience for the student and presume that different students' experiences may be variable, encompassing different sites with different activities. Students have the option of conducting practicum work in a variety of suggested placements. Students may also propose their own placement site. *Can be repeated for credit. Letter or P/NP grading. Ed Minor students may enroll in this course for some or all of the field units for the Minor. For questions or to enroll, contact educw144@berkeley.edu.*

FIELD STUDY COURSES – Other Departments

ASAMST 197 – Youth Mentorship Program/Pilipinx Academic Student Services (PASS) (1-2 units)

Students enrolled in this course will engage in a mentorship program at two San Francisco school sites, namely the Bessie Carmichael Elementary School and the Bessie Carmichael Filipino Education Center. Students will be working with Galing Bata, an afterschool program that caters mainly to K-8th grade children living in the South of Market District. Galing Bata is recognized as one of the few Filipino bilingual-bicultural after school programs in the country, although it is by no means exclusive to students of Filipino heritage. As part of the course, mentors will tutor the students, mainly in Math and English, and facilitate workshops that promote student development. Mentors will also have the opportunity to participate in other activities such as sports, educational games, and field trips. In addition, the course will consist of bi-weekly seminars for the discussion of selected topics and required readings. The course is available during the Fall and Spring semesters for 1-2 units and can be taken multiple times. An enrollment code can be obtained from the course facilitator. There will be an info session during the second or third week of classes. Further information, contact: youth.mentorship@gmail.com.

ELECTIVE COURSES – School of Education

EDUC C122 Research Methods for Science and Mathematics K-12 Teachers (3) Gerard

Students undertake several in-depth research projects to develop methods for engaging in authentic research in the science or mathematics content area related to their major. Interactive lectures and labs are designed to meet the needs of future teachers by practicing specific techniques--including statistics, mathematical modeling, and scientific writing--needed to address scientific questions so that they may guide their future K-12 students to develop skills in problem solving and research. (*Cross listed with UGIS C122*).

EDUC 130 Knowing and Learning in Mathematics and Science (3) Staff

This course offers a sequence of collaborative problem-solving and reflection activities through which students will be able to appreciate and develop a coherent, effective approach to the teaching and learning of any mathematical or scientific conceptual domain. Issues of cognition, culture, and pedagogy will emerge from participants' struggles to explain their own reasoning. In-class problem solving experiences will provide grist for reflection. Extensive readings are discussed in a bSpace forum. Students are placed in, and do course projects in, local classrooms for approximately 24 hours. *Fieldwork is a course requirement and does NOT count as fieldwork for the Minor. Permission number required – contact Calteach program: advising_calteach@berkeley.edu*

EDUC 131AC – Classroom Interactions in Sci and Math: A Focus on Equity and Urban Schools (3) Golub

This course continues the process of preparing students to teach science and mathematics in secondary schools by providing opportunities to evaluate challenges they face in instructional settings. We will explore frameworks for thinking about equity issues in the classroom and beyond school settings, learn strategies for teaching students of diverse backgrounds, and consider how classroom interactions enable students to develop a deep conceptual understanding of the subject matter. *This course satisfies the American Cultures requirement. Permission number required – contact Calteach program: advising_calteach@berkeley.edu*

EDUC 140AC The Art of Making Meaning: Educational Perspectives on Literacy and Learning in a Global World (4) Hull

This course combines theory and practice in the study of literacy and development. It will introduce sociocultural educational theory and research focused especially on literacy teaching and learning, and this literature will be examined in practice through participation in computer-based after-school programs. In addition, the course will contribute to understanding of race, culture, and ethnicity in the United States. We will develop a view of literacy, not as a neutral skill, but as embedded within culture and as depending for its meaning and its practice upon social institutions and conditions. Satisfies the American Cultures requirement. *Fieldwork will count as 1 unit of Minor approved fieldwork. Students are not permitted to enroll in Educ W140A and Educ 140AC.*

EDUC W140A The Art of Making Meaning: Educational Perspectives on Literacy and Learning in a Global World (4) Hull

This web-based course combines theory and practice in the study of literacy and development. It will introduce sociocultural educational theory and research focused especially on literacy teaching and learning, and this

literature will be examined in practice through participation in after-school programs. In addition, the course will contribute to an understanding of how literacy is reflected in race, culture, and ethnicity in the United States and how these symbolic systems shift in a digital world. Satisfies the American Cultures requirement. *Fieldwork will count as 1 unit of Minor approved fieldwork. This is a web-based version of Educ 140AC. Students are not permitted to enroll in Educ W140A and Educ 140AC.*

EDUC W141 Exploring Digital Pedagogy (3)

Hull/Sobko

Over the past decade, online education and classroom-based education have begun to converge in the form of digital pedagogy. What does this mean for the role of the instructor, how a student learns, the design of a learning experience, the structure of education and the impact on society overall? This course provides the opportunity to explore issues that are impacting 21st century education and pedagogy due to the disruptive force of technology.

EDUC 150, Sec 1 Adv Studies in Educ: Citizenship Education and Social Conflict (3)

Alexander

This course is an advanced undergraduate seminar in current issues and topics in education. Course will focus on specific issues or research methods in the multidisciplinary field of education. A major research project is required as well as class presentation. Topics change each semester. Class description coming soon!

EDUC 154 Language in/and the World (3)

Sterponi

A nuanced understanding of how language reveals and conceals realities of the world is an important asset for any educational enterprise that aims toward a critical and transformative engagement with the world. This course focuses on the relationship between language and the world: language inhabits the world that language itself contributes to shaping.

EDUC W161 Digital Learning Environments (3)

Pardos

Digital learning environments are taking residence in the educational experience of many, from replacing components of traditional classroom instruction to providing open platforms for lifelong learning. In this class we will study the various forms and functions of a sampling of digital learning environments ranging from subject specific Intelligent Tutoring Systems in K-12 to domain neutral systems for post-secondary online learning.

EDUC W164 Early Childhood Policy - Children, Contexts, and Politics in Diverse Societies (3)

Fuller

This web-based course examines how, when and why government intervenes in children's lives, through family, pre-school, community, and digital media contexts, aiming to improve their trajectories. From this basis, we examine how the effects of policies on children locally, nationally, and internationally. Drawing from a variety of case studies and empirical research, students will gain a deep understanding of policy goals, development, implementation, and implications. After gaining familiarity with early childhood policies, students will develop their own policy at the family, pre-school, community, or digital media level.

EDUC 168 Educational Testing in the USA: Issues a Practical Experience (3)

Wilson/Draney

The aim of this course is to discuss and debate important issues that arise regarding educational testing, focusing on the US context, but including international perspectives as well. In order to give the students a practical experience regarding these issues, each student will participate in a group exercise to develop their own measurement instrument. Thus, this course has two parts: (a) to give students exposure to the important contemporary issues in educational testing in the USA; and (b) to give students a chance to experience how tests and other instruments are developed.

EDUC 188F Language, Race, and Power in Education (3)

Baquedano-López

This course is designed to critically examine the intersection of language, race, and power in education. Through dialogue, readings, research, and critical analysis the course aims to foster awareness of the ways in which seemingly neutral education processes are inherently embedded in power dynamics around language use. Participants will discuss the purposes of education, the ways schooling and education are related to other societal structures, and the potential of education to productively address inequalities, especially as they impact students of historically racialized groups (e.g. Latino/a, African-American, Native-American, and Asian).

GRADUATE COURSES IN EDUCATION: *Students may also take a maximum of two (2) graduate level courses in the School of Education (200 level) to meet the elective requirement. Instructor permission is required prior to enrollment. Courses must be at least 3 units.*

ELECTIVE COURSES – Other Departments

- CHICANO 172 Chicanos and the Educational System (4) Martinez-Calderon**
An examination of the historical and contemporary relationship between the educational system and the Mexican community in the United States; the history of schooling practices within the Mexican population as a backdrop to an examination of the current educational conditions of the Chicano students; the different historical trends in the education of Chicanos including alternative schools, bilingual education, school segregation, and higher education.
- COG SCI 1 Introduction to Cognitive Science (4) Staff**
This course is an introduction to the interdisciplinary field of cognitive science. Lectures and readings will survey research in such fields as artificial intelligence, psychology, linguistics, philosophy, and neuroscience; and will cover topics such as the nature of knowledge, thinking, remembering, vision, imagery, language, and consciousness. Sections will demonstrate some of the major methodologies. *Enrollment priority for Cog Sci majors.*
- COLWRIT 25AC Reading in and about US Educational Institutions (3) Staff**
In this course, we will read, discuss, and write about the expectations of the American educational system, especially within a multicultural context. The goal is to deepen the understanding of the history and diversity of American educational institutions, while strengthening reading and seminar participation skills through critique and analysis of communication patterns. This course is intended for international students but is open to all. *Satisfies the American Cultures requirement.*
- CY PLAN 190, Sec 1 Adv Topics in Urban Studies: Neighborhood Planning w/ Youth: Y PLAN (4) McKoy**
The Y-PLAN (Youth – Plan, Learn, Act, Now) is an interdisciplinary course and an award-winning initiative where students in urban planning, design, education, and other related disciplines learn how to engage youth as genuine stakeholders and participants in local planning projects. After an initial teaching preparation phase, UCB students work side-by-side with local high school students for ten weeks teaching them fundamentals of community development by engaging in real world planning projects. Readings and seminar discussions focus on theoretical tools in participatory planning and teaching, complementing the practical application.
- LINGUIS C146/PSYCH C143 Language Acquisition (3) Srinivasan**
An overview of topics and theories in language acquisition: early development of speech perception and production, word learning, generalizing linguistic structure, and differences between first language acquisition, second language acquisition, and bilingualism. We will also compare different theoretical approaches, and address the classic "nature vs. nurture" question by examining both traditional generativist approaches and more recent usage based models.
- PSYCH 131 Developmental Psychopathology (3) Hinshaw**
This course will discuss linkages between developmental processes and child psychopathology. Included will be discussion of cognitive impairments in children, including learning disabilities and mental retardation; internalizing disorders, such as anxiety, withdrawal, and depression; externalizing disorders, such as attention-deficit hyperactivity disorder and conduct disorder; and child abuse and neglect. Psychobiological, familial, legal, and societal factors will be emphasized.
- PSYCH 140 Developmental Psychology (3) Xu**
This course explores the development of children from birth to adolescence, in a wide range of areas including biological, cognitive, linguistic, social, and personality development. It also covers the effects of genes, experience, and social context on children's development.
- SOCIOL 111C Sociology of Childhood (4) Daniel**
This course focuses on children and on varied contexts and experiences of growing up; it also highlights the social organization and meanings of age. It explores the idea of childhood as a social construction, including cross-cultural and historical variation in assumptions. Then it highlights the changing political economy and history of childhoods, including children's roles in consumption and production in the world. Lastly, it examines the intersecting dynamics of age, social class, racial ethnicity, gender and sexuality in growing up.

SOCIOL 113 Sociology of Education (4)

Staff

The role of formal education in modern societies. Educational systems in relation to the religious, cultural, economic, and political forces shaping their character.

UGIS C122 Research Methods for Science and Mathematics K-12 Teachers (3)

Gerard

Students undertake several in-depth research projects to develop methods for engaging in authentic research in the science or mathematics content area related to their major. Interactive lectures and labs are designed to meet the needs of future teachers by practicing specific techniques--including statistics, mathematical modeling, and scientific writing--needed to address scientific questions so that they may guide their future K-12 students to develop skills in problem solving and research. (*Cross listed with Educ C122*).
